

Annual Capacity

**8GW**

Half-cut Module

**182 210**

Tongwei half-cut modules adopt series and parallel design, unique layout and circuit design, excellent load and EL performance, leading technology in the industry. Tongwei has formed an annual module production capacity of 8GW. At present, Tongwei high-efficiency half-cut modules cover 400W+, 500W+ and 600W+, which are widely used in household rooftops, industrial and commercial distributed and large-scale ground power stations.

Annual Capacity

**7.2GW**

Shingled Module

**166 210**

In 2016, Tongwei gradually started the road of shingled modules. It committed to the development and promotion of shingled technology and formed fully flexible, low-lead and environmentally friendly shingled module products. After several generations of technology precipitation and development, the existing shingled production capacity is the second largest in the world, with an annual module production capacity of 7.2GW.
